team or analysts and contractors was assembled in May, 1977 to conduct the feasibility study and later related research and development efforts.

staff surmounted a series of difficult-and seemingly impossible--obstacles in proving the feasibility of using these techniques, which have provided CIA with a major new capability for obtaining substantive intelligence on

In each case, the staff collectively developed innovative methods for obtaining the needed data indirectly and verifying the accuracy of each of these substitutions. Both the Agency personnel and contractors worked untiringly through many long nights to achieve their goals.

4. Analysts and scientists from a variety of CIA offices participated directly in the effort, and the Project was supported indirectly by collection and analysis efforts operating concurrently in other offices and government Agencies. The following CIA personnel contributed directly to the success
